3" paint brush
primer
paint
caulk

FAV PAINT COLORS

- White: White Dove by Benjamin Moore
- Blue: Hale Navy by Benjamin Moore
- Gray: Gravel by Restoration Hardware

1

TOOLS AND MATERIALS

First step to any home project is getting all of your tools and materials in order and space prepped.

2

FIND + MARK STUDS

Use a stud finder and mark off with a pencil where the studs are so you know exactly where to nail into the shiplap boards.

3

MEASURE + CUT

Figure out where your starting point is and measure from wall to wall to determine the length to cut your boards.

4

LEVEL

After nailing up the first board and making sure it's perfectly level, you can take the next board and stack it tight to the one above it.

5

HANG + NAIL BOARDS

One by one, nail your boards up; ensuring you are hitting your marked off areas on the studs with a nail gun.

6

PAINT

You can paint before or after you hang the boards, but to save time & get a good finish hang after to cover nail holes & get an even finish with a mini roller.
